Brief Description Of Services : Campbell County Health Home Health and Hospice delivers comfort and care to your door. Home Health provides care to patients at home-where they receive support from trained medical professionals, family, friends, plus the comfort of familiar surroundings. Regardless of age, everyone appreciates the comfort and convenience of recovery in their home as an alternative to hospitalization or a nursing home. Home healthcare may also mean earlier discharge from the hospital, and lower healthcare costs. It is a personalized form of care, which may be paid by Medicare, Medicaid, private insurance, or directly by the patient. Hospice is a special kind of care for people with life-limiting illnesses. Hospice is not a place, it is an all-encompassing approach to the care provided in the comfort of your home or where you call home. Hospice care addresses the physical, emotional, and spiritual needs of the patient through comfort care, symptom and pain management and other life-limiting or terminal illnesses.
